

PHIL CARRIERE

BIOGRAPHY

In the constant quest for learning, I like to push my limits. I am a self-taught photographer and graphic designer who graduated in cabinet making. In 2016, I graduated from Marsan school of photography. That being said, my main area of expertise is the printing and woodworking industries. I have worked for over 20 years in the field of printing and 5 years into woodworking. It's curiosity and devotion to all the different print technologies and the wide variety of materials that motivated me to discover unique and remarkable finishing processes. Real explorer and open-minded, all my passions come to life in my art.
